NAME

extconv − convert a TeX document in either Big 5+ or GBK encoding into ‘preprocessed’ form.

SYNOPSIS

extconv < *infile* > *outfile*

DESCRIPTION

Big 5+ and GBK encodings use the characters `{`, `}`, and `\` which have special meanings in TeX documents.

After processing a LaTeX 2_ε document which contains such characters with **extconv** you need not care about these special characters.

This filter is part of the **CJK** macro package for LaTeX 2_ε.
